

ERB Approved Course = 1.5 Hours CE Credits!

"Twenty Reasons Your Green Building May Not Have Green Indoor Air"

Presented by: Dale Walsh, MS, CIH, LEED®AP BD+C

March 28, 2012—11:30 am

Course Description:

The topic of this course is indoor air quality (IAQ) and how many commonly implemented design and construction aspects can negatively impact IAQ. This course will inform attendees of these issues so that they may be avoided in future building designs and construction, especially in the Green building industry. Attendees will leave the course with a basic knowledge of IAQ and twenty specific examples of how their participation in the design, construction, and operation of a building can be altered to prevent the twenty issues identified.

FREE FOR MEMBERS ONLY! (limited to the first 20 people to register)
