

Green Munch & Learn

How do you save up to 8% of your kilowatt hours and add electrical capacity

Presented by:

Nick Burton
Harmonics Limited

Nick will explain that the cheapest "New Power Plant" is the one you don't have to build. There is a renewable energy resource that is perfectly clean, remarkably cheap and surprisingly abundant as well as immediately available. It's called Energy Efficiency. Harmonics Limited focuses on a key component in our customer's electrical distribution system for saving energy and increasing usable capacity by eliminating 3rd harmonic currents that flow throughout their system.

Date: Friday, July 31, 2009
Time: 11:30-11:50 Registration
